EACH PIECE WILL HAVE UNIQUE CHARACTERISTICS...

The heartwood of the Guanacaste tree is a medium to dark chocolate brown, often with a reddish hue. Darker streaks of brown are sometimes present. The sapwood is a pale yellow and is clearly demarcated from the heartwood. Guanacaste grows from Mexico to the Northern part of South America and is one of the largest growing trees, yielding slabs that can be up to 8 foot in diameter. Each Live Edge piece will be unique in color and grain pattern. Small imperfections, such as cracks and pin knots are to be expected and only add to the character of the piece.

INTRODUCING CURLY MAPLE...

Curly Maple is not actually a species, but simply a description of figure in the grain. The ripples in the grain pattern create a three-dimensional effect that appears as if the grain has "curled" along the length of the board. Our special board selection creates this unique Curly Maple Table. We have maintained the Live Edge on all of the tables. Curly Maple is finished in Stormy Mink, casting a gray brown color palette that highlights the figure.
